Welcome to AP Computer Science Principles

Don’t worry if you have never programmed. This year, you will learn how to code in Python. The purpose of the AP Computer Science Principles (AP CSP) summer assignment is to prepare students for the challenges in AP CSP and to ensure the student is aware of the content and commitment level involved in this college level course. Please read and complete all steps in this document.

The assignment is due the first day of school.

In this course, collaboration is encouraged but cheating will not be tolerated. In order to learn the content you must design, debug, and write your own programs. You may answer questions of your classmates and help them with design but you may not email or let them look at a copy of your code.

2020 Summer Assignment:

- Follow the link below to sign-up for a CodeHS account (if you already have a CodeHS account, then to switch classes, use the code E6BF5). [https://codehs.com/go/E6BF5](https://codehs.com/go/E6BF5)

- You will be enrolling in AP CSP 2020-21. The CodeHS name for this course is “AP CP in Python”.

- **You are to complete:**
  - Module 1: Computer Science Principles Pretest
  - Module 2: Introduction to Programming
  - **DO NOT go further into the course.**
